WORK EXPERIENCE

IBM

ADVISORY SOFTWARE ENGINEER

Durham, NC | July 2017 - July 2021

- Collaborated with GitHub and TravisCI enterprise support teams to investigate software issues
- Hosted and maintained a highly available resilient environment at scale
- Developed automation to manage all infrastructure components
- Performed large scale data migration between cloud providers
- Conducted a pilot offering of Semmlle
- Designed and lead the strategy for the migration of data from IBM GitHub Enterprise to Kyndryl GitHub Enterprise
- Assisted the ZenHub and Jira SRE squads in debugging performance related issues

IBM

SOFTWARE ENGINEER

Durham, NC | September 2015 - July 2017

- Hosted applications such as Jenkins, Artifactory and UrbanCode as cloud services
- Designed and implemented a highly available network architecture to support cloud based tooling
- Developed automation to maintain network configurations on various routers
- Organized developer workshops to teach programmers how to develop code with the DevOps mentality

GENERAL MOTORS COMPANY

MOBILE APPLICATIONS / SHAREPOINT INTERN

Lake Orion, MI | May 2014 - August 2014

- Collaborated with plant management to develop a proof of concept android application written in Java to help audit tools more efficiently
- Developed MySQL queries to create views for management to read tool data and forecast trends
- Collaborated with various teams across the plant to identify current document control processes and how they can be improved
- Redesigned the internal SharePoint site to be more user friendly and intuitive for all plant personnel

ACTIVITIES

IBM JumpStart Instructor

January 2018 - July 2021

- Facilitated coding workshops to teach new hires about agile development and design thinking
- Taught workshops at various IBM developer sites in USA and Canada

IBM Developer Buddy

January 2019 - July 2021

- Mentored developers who recently onboarded to IBM
- Organized local social events to introduce new hires to the local IBM community
